IB CAREER-RELATED PROGRAMME

The Career-related Programme (CP) is a comprehensive education framework that brings the academic rigour and global focus of the International Baccalaureate (IB) programme to a customised, career focused pathway for students who wish to pursue a career-related education with a unique IB experience.

The IBCP is specifically developed for students who wish to engage in career-related learning while gaining transferable and lifelong skills in applied knowledge, critical thinking, communication, and cross-cultural engagement.

BENEFITS OF THE CAREER-RELATED PROGRAMME (CP)

IB Rigor prepares students for college admission and success. As a result of the IBCP programme, graduates have found that universities and higher education institutions value the skills, experience and qualifications gained during the course. Universities recognise the academic rigour of the DP aspect of the programme, while the international outlook and vocational teaching give students a portfolio of relevant skills which they can continue to grow.

IBCP IN NCFE

Career-related studies(CRS)

- **Artificial Intelligence**
- **Business Administration**
- **Dietetics and Nutrition**

The CP CORE

The cp core components are designed to bridge each student's chosen academic courses and their career-related studies, while developing skills and competencies for lifelong learning. The cp core components are
